

# Why Mercedes-Benz Genuine Tires?

- Shorter stopping distances
- Ideal tire-road contact, even in wet conditions
- Good high-speed qualities
- Low tire noise thanks to good rolling properties
- Rubber compounds specially tailored to the various seasons
- Perfect adjustment to your Mercedes-Benz model
- Low treadwear
- Smooth ride due to minimal transfer of road irregularities
- Carefully inspected to ensure ultimate quality

## MO Tires.

Mercedes-Benz tires are marked with MO on the sidewall. These tires are tested at the highest levels – and they're the only tires Mercedes-Benz considers genuine.

Specifically engineered to support Mercedes-Benz vehicles

## MOExtended Tires.

Mercedes Original Extended tires feature a reinforced sidewall. When they lose air pressure, you can continue driving for a limited period.

- No need for a spare tire – save fuel and gain cargo space
- Optimized for ultimate comfort
- Rigorously tested under extreme conditions

Reinforced so you can continue to drive if it loses air pressure
